Asia-Pacific Group

1. Indigenous and local communities to engage all UN processes and bodies relevant to tackling Climate Change.

2. The Joint Liaison Group of the CBD/UNFCCC/UNCCD to establish a Working Group/Expert body on Traditional Knowledge and Climate Change.

3. IPs and local communities to undertake case studies, field research and develop and disseminate information packages to influence the discussion on redd/REDD at the national, regional, international levels in collaboration with UNU, research bodies and universities and relevant partners.

4. The government to develop a legal framework and consultation mechanisms for indigenous peoples based on free, prior and informed consent (FPIC).

5. Enhance capacities of all actors and structures at the local, national, regional and international levels to act effectively and with responsibility on redd/REDD.

6. Each REDD pilot country be required to report on the legal situation of Indigenous territories, lands and resources and rights of local communities.

7. Establish a subnational processes and mechanisms to decentralize redd/REDD, including benefit sharing.

8. Establish an Independent Committee (indigenous peoples, NGOs, others) to monitor all REDD activities at all levels.

9. UN REDD should have a grievance and recourse mechanism to ensure that IP rights are observed at the national and international levels.

10. Establish an Indigenous Peoples Working Group on Climate Change at the national and regional levels.

11. Establish an IP Global Coordinating Body on Climate Change.

12. Request UN REDD to organize national roundtables on UNDRIP and other practical tools for concrete implementation as a matter of urgency.

13. UN REDD and other donors should have specific funds and facilities that IPs and local communities can access directly.

14. IPs to establish funds for Climate Change actions that are under their management, direction and control.

15. Empower the communities and raise awareness on redd/REDD issues through the media and other learning materials (e.g., community and national radios) to assist them to participate effectively.

16. UN REDD and other stakeholders to work through legitimate Indigenous and local communities, institutions and organizations, ensuring that there is broad representation of IPs with gender considerations.
